The above documents are considered pertinent for the following reasons:

References A14, A15, A16, A17 and A18 describe IL-2 and IL-2 receptors and antibodies thereto, including anti-Tac antibody, the humanization of which is an example in the present application.

References A2, A3, A12 and A22 describe structural aspects of immunoglobulins.

References AA, AB, AD, AE, AG, AH, AI, AJ, A4, A5, A6,

A7, A8, A9, A10, A11, A13, A19, A24 and A25 generally describe recombinant immunoglobulins, particularly chimeric immunoglobulins.

Reference AK describes monoclonal antibodies to IL-2 receptors and also mentions chimeric antibodies, e.g., at page 2, lines 21-27.

References AC, AF, A20, A21 and A23 describe production and use of humanized immunoglobulins (i.e., containing non-native complementarity determining regions).

Reference A1 describes immunotoxins.

Respectfully submitted,

TOWNSEND and TOWNSEND
